

# YOUR DRYER ISN'T THE ONLY PROBLEM

→ The exterior box contains a bird screen that will not allow lint to pass to the outside.

→ A defective fan motor or clogged fan blade becomes a restriction in the system.

→ A dirty lint screen will cause lint to be backed up right to the dryer.

→ Lint trapped in the dryer because of any or all of the above, will cause a **FIRE!!!**

→ Complete system Maintenance on a regular basis will keep your dryer system problem free.

## COMPLETE DRYER SYSTEM MAINTENANCE

- Dismantle the dryer and vacuum internally
- Clean lint screen
- Remove exhaust fan and clean fan blades
- Vacuum ductwork from wall box to dryer
- Replace any damaged flex-hose

### Optional Service

- Metallic flex-hose replacement
- Washer hose replacement
- Exhaust fan motor replacement
